

CENTRIFUGAL MONOBLOCK PUMP

Turaco monoblock pumps are highly energy efficient and have high performance. Our multi purpose pumps are used in domestic, Industrial and Agriculture sectors all over the world.

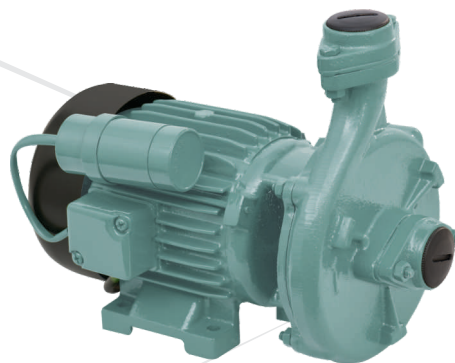

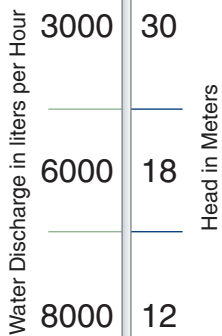

Made from the highest quality raw material and carefully designed based on many field conditions, the pumps are constructed rigidly with graded cast iron frames and driven by powerful motors which are designed to perform well in the extreme low and high voltage conditions.

SPECIAL FEATURES

1. More water discharge.
2. Highly Efficient in its class
3. Lowest power consumption
4. Noise Free Operation
5. Trouble free operation for a long period.

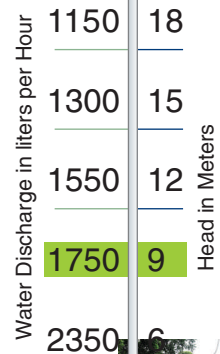

APPLICATION

1. Pumping Water from Sump
2. More suitable for more water requirement in domestic sector
3. Small gardens, Sprinkle & Lawn

DPCF006 0.5 HP

Centrifugal motor with Copper winding
 Water Discharge : 6000 LPH
 Total Head : 19 Meters
 Suitable for high discharge with low head

DPCF007 1.0 HP

Motor with copper winding
 Water Discharge : 8500 LPH
 Total Head 30 Meters
 Suitable for high discharge with low head
